TO: Sheriff Timothy K. Cameron

SUBJECT: Analysis of Officer Use of Force for 2017

The following is an analysis for the use of force by deputy sheriffs of the St. Mary's County Sheriff's Office during the periods of January 1 through December 31, 2017. Data for the analysis was derived from the collection of the Use of Force reports completed by law enforcement officers and reviewed by the officer's chain of command. Once the reports are reviewed and approved, they are forwarded to the Office of Professional Responsibilities and entered into the Early Warning System.

Sheriff's Office policy states, in part, all instances of the use of firearms, with the exception of dispatching an animal, FN-303, TASER discharges, chemical agents, pressure point control tactics, impact weapons, physical force other than routine handcuffing, a Use of Force Report a Blue Team Use of Force entry will be completed. This includes directing any firearm or TASER at a person. In addition supervisors are now required to complete a supervisory review of all instances of use of force when able to do so.

In 2017, the Sheriff's Office handled 69,709 calls for service as compared to 66,780 for the year 2016. There were 144 instances of use of force. This equates to force being utilized once in every 484 calls for service.

Refer to the attached IA Pro Use of Force report for the statistical data.

Analysis

In calendar year 2017, the Agency reported 144 Use of Force incidents, in comparison to 2016, wherein 158 incidents reported. There was a 9% decrease in the overall Use of Force incidents. This is not a significant decrease, but a decrease nonetheless. This would indicate deputies are utilizing their training in de-escalation techniques as the overall call for service increased by 4%.

TO: Sheriff Timothy K. Cameron – February 5, 2018

SUBJECT: Analysis of Officer Use of Force for 2017

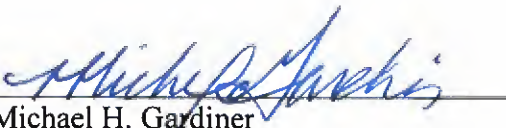

Refer to the attached IAPro report of Use of Force for a breakdown on the types of force utilized by sworn personnel.

Recommendation

From the review of the use of force reports from 2017, and in comparison to previous year's statistical data, all use of force incidents were within the scope of agency policy and procedure. There were no identifiable trends that would indicate excessive or brutal force being utilized by agency personnel. In 2017 there were two complaints of excessive force. Both complaints were identified by reviewing supervisory personnel. One investigation concluded the officer's use of force was justified. The second investigation revealed the use of force was not excessive however; the officer received remedial training in regards to job performance. The Use of Force review proved to be effective as the review revealed two Use of Force incidents in need of investigation.

Hopefully the decline in the use of force will continue as a trend in the years to come.

It is apparent based upon the data the sworn personnel within the St. Mary's County Sheriff's Office are adhering to their training and are adhering to the policies of the office. It is evident supervision is holding their personnel to task thus reducing agency liability. The efforts of all the Sheriff's Office personnel should be commended.

Michael H. Gardiner
Lieutenant
Office of Professional Responsibilities
